PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in PHP, Laravel, MySQL, JavaScript, React.js, Node.js, and Express.js. Skilled in building ERP systems, admin dashboards, RESTful APIs, CRUD modules, authentication and authorization workflows, database-driven applications, reporting modules, and responsive web interfaces. Experienced with Laravel MVC, Eloquent ORM, middleware, validation, file uploads, API integration, query optimization, Git/GitHub, Postman, Docker, CI/CD pipelines, and production application maintenance.

TECHNICAL SKILLS

Programming & Backend: PHP, Laravel, Node.js, Express.js, JavaScript, RESTful API Development, MVC Architecture

Laravel: Eloquent ORM, Blade, Livewire, Middleware, Validation, Authentication, Authorization, File Uploads, API Integration

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design, Admin Dashboard UI

Databases: MySQL, MongoDB, Database Design, Database Relationships, Query Optimization, Data Reporting

Tools & DevOps: Git, GitHub, Postman, Docker, CI/CD Pipelines, Composer, NPM, Deployment Support

Application Types: ERP Systems, SaaS Applications, Admin Panels, E-commerce, Booking Platforms, Management Systems

PROFESSIONAL EXPERIENCE

Laravel Developer | Optimum Tech | Faisalabad | Feb 2025 - Present

Develop and maintain Laravel ERP modules using PHP, MySQL, Livewire, Bootstrap, JavaScript, and RESTful APIs.

Work on Wapda City ERP system and mobile app dashboard modules, including admin workflows, data reporting, and dynamic management screens.

Build backend APIs for web and mobile applications with validation, authentication, authorization, database operations, and multipart file upload handling.

Developed Apollo ERP system modules for business operations, dashboard views, records management, and administrative reporting.

Create database tables, Eloquent relationships, controllers, Blade views, and reusable Laravel components following MVC architecture.

Optimize Laravel controllers, MySQL queries, and application modules to improve maintainability, performance, and production stability.

Use Git, GitHub, Postman, Composer, and deployment workflows to test, maintain, and release application updates.

PHP Laravel Developer | WAPEXP Institute of Information Technology | May 2024 - Jan 2025

Built Laravel-based web applications with admin panels, CRUD operations, authentication, validation, and MySQL database modules.

Created responsive interfaces using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS for web application dashboards and public pages.

Designed database tables, relationships, forms, filters, and reporting screens for data-driven application modules.

Integrated RESTful API endpoints and improved backend code structure using Laravel MVC, controllers, models, migrations, and routes.

Tested application features, fixed bugs, and supported deployment-ready code using Git/GitHub version control practices.

SELECTED PROJECTS

Wapda City ERP System and Mobile App Dashboard - Laravel Developer

Tech Stack: Laravel, PHP, MySQL, Livewire, Bootstrap, REST APIs

Developed ERP dashboard modules, admin workflows, reporting screens, and database-driven management features.

Built secure API endpoints for mobile app integration, including authentication, validations, and file upload processing.

Worked with Laravel MVC, Eloquent relationships, query optimization, and reusable components for maintainable ERP modules.

Apollo ERP System - Laravel Developer

Tech Stack: Laravel, PHP, MySQL, JavaScript, Bootstrap

Developed ERP modules for business operations, record management, dashboards, CRUD screens, and administrative reporting.

Created database structures, Laravel controllers, models, migrations, and Blade views for core system functionality.

Improved module maintainability through reusable code structure, validation rules, and organized backend workflows.

Home Services Booking Platform - Full Stack Developer

Tech Stack: Laravel, React.js, MySQL, REST APIs, Bootstrap

Developed a live service booking platform that allows users to hire electricians, plumbers, technicians, and other service providers through web and mobile interfaces.

Built service listing, booking management, customer-provider communication, admin management, and responsive UI workflows.

Implemented database structures for service categories, bookings, users, providers, and application content management.

Live Project: <https://smartkarigar.com/>

AI-Powered E-commerce Store - Full Stack Developer

Tech Stack: Laravel, React.js, MySQL, Laravel AI SDK, REST APIs

Built a complete e-commerce store with user site and admin panel using Laravel, React.js, MySQL, and RESTful APIs.

Developed product catalog, category management, customer workflows, order management, admin dashboard, and reporting features.

Integrated Laravel AI SDK to support chat-based data analysis, allowing users/admins to ask questions and analyze store data through conversational AI.

Implemented backend validation, authentication workflows, database relationships, API endpoints, and responsive React interfaces for production-ready e-commerce operations.

E-commerce Web Application - Full Stack Developer

Tech Stack: Laravel, PHP, MySQL, JavaScript, Bootstrap

Developed product browsing, category management, cart, order processing, checkout flow, and admin management modules.

Built backend CRUD operations for products, categories, customers, orders, inventory records, and application content.

Used Laravel validation, Eloquent ORM relationships, database queries, and responsive UI components to manage core e-commerce operations.

Real-Time Chat Application - Full Stack Developer

Tech Stack: Laravel, Laravel Echo, MySQL, JavaScript

Built a real-time chat application using Laravel Echo for instant messaging and live user communication.

Created message handling workflows, chat history storage, user communication screens, and database records for conversations.

News Management System - PHP Developer

Tech Stack: PHP, Laravel, MySQL, Bootstrap

Built a news management system with admin panel modules for categories, news, events, polls, media, and public portal content.

Implemented CRUD operations, media management, content publishing workflows, and structured administrator screens.

Event Management Platform - Full Stack Developer

Tech Stack: Laravel, MySQL, JavaScript, Bootstrap

Created an event management platform for events, bookings, planners, volunteers, user participation, and portal workflows.

Built admin features, interactive pages, database relationships, and reporting views for event operations.

Library Management System - Laravel Developer

Tech Stack: Laravel, PHP, MySQL, Bootstrap

Developed a Laravel-based system for managing books, users, borrowing records, returns, and administrative tracking.

Designed database relationships, validation rules, CRUD modules, and reporting screens to streamline library operations.

EDUCATION

BSc Electrical Engineering & Technology | Oct 2019 - Jun 2023

Govt. College of Technology Samanabad, Faisalabad | Affiliated with UET Lahore

CERTIFICATIONS

Web Development - M Salman | May 2024

Completed training in HTML, CSS, JavaScript, responsive design, and core web development concepts for building interactive websites.
